                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     q
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     ó
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 qu ```

FUNCTION: Plays an important role in growth control. Its major role in stimulation body growth is to stimulate the liver and other tissues to secrete IGF-1. It stimulates both the differentiation and proliferation of myoblasts. It also stimulates receptor complex."; \*Characterization of single-nucleotide polymorphisms in coding regions MEDLINE-\$99318093; PubMed-10391209; Cargill M., Altshuler D., Ircland J., Sklar P., Ardlic K., Patil N., Shaw N., Lane C.R., Lim E.P., Kalyanaraman N., Nemesh J., Zlaugra L., Friedland L., Rolfe A., Warrington J., Lipshutz R., Daley G.Q., Cargill M., Altshuler D., Ireland J., Sklar P., Ardlie K., Patil N., Shaw N., Lane C.R., Lim E.P., Kalyanaraman N., Nemesh J., Ziaugra L., Friedland L., Rolfe A., Warrington J., Lipshutz R., Daley G.O., MEDLINE-82052997; PubMed-7028740; Lewis U.J., Singh R.N., Bonewald L.F., Seavey B.K.; Mitered proteolytic cleavage of human growth hormone as a result of Norstedt G.; Norstedt G.; Norstedt G.; Norstedt G.; Crystal structure of an antagonist mutant of human growth hormone, G.20K, in complex with its receptor at 2.9-A resolution."; J. "Cloning and consactation of a pitative growth hornces constitut
"Cloning and consectivation of a pitative growth hornces constitut
Submitted (AGG-2000) to the EMBL/Gendank/DBBJ databases.

-!-FUNCTION: Plays an important role in growth; courted. Its major
role in strainlating body growth is to strainlates holl from other tissues to secrete ide-it strainlates both the
differentiation and proliferation of myoblasts. It also stimulates
amino acid uptake and protein synthesis in mascle and other
tissues (By similarity).

-!- SURCELIGIAR LOCATION: Secreted.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      2 FPTIPLSRIEDNAMIRAHRISGIAFOIYOEFROAYIPKSGKYSFLQNEOTSISFSGSIFT

Its major role in stimulating body growth is to stimulate the liver and other tissues to secrete 10F-1. It stimulates both the differentiation and proliferation of myoblasts. It also stimulates amino acid uptake and protein synthesis in muscle and other
